ANNUAL PLANT COLLECTION

# *2013*

# Blessings in 2013

Last year was certainly good to us - 2012 brought us 4 beautiful new grandchildren to add to our growing family. A new crop of Eddingers! I'm looking forward to watching them grow and explore the world around them in 2013 and beyond.

At Buds and Blossoms, we are exciting to be offering many new plants for sale to our customers but also for us to play with in the greenhouse. We will be experimenting with new combinations throughout the upcoming season to keep our look fresh and new. Some of the new plants we are happy to offer this season include the "Glamourflage Petunia" from Hort Couture and the "Sparks Will Fly" Begonia from Ball. They will be available on a first come, first serve basis so watch for our latest availability.

We're sad to see my son, Zach, move on to other business ventures. We will surely miss him around the greenhouse and at Stone Post Gardens. I'm sure he will still be kicking around here once in awhile. You know this business is one that keeps us happy and feeds our souls.

I'm looking forward to working with you this season. Here's to a happy, healthy and profitable 2013!

## Full Sun

Available starting the beginning of May, these baskets and planters are combinations that perform well when exposed to full sunlight. These combinations do best when the location has six or more hours of direct sun in the middle of the day when the sun is strongest. Southerly and westerly exposures, unless shaded by trees or your house, are considered full sun locations. All of our full sun Bobbi's Bloomers can thrive with more than the required six hours per day, but need regular water to endure the heat.

# Part Shade

Available starting the beginning of May, these planters and baskets require three to six hours of sun each day for optimum blooming. Part shade and part sun are two terms that are often used interchangeably. Morning or late afternoon sun is best. Porch and patio locations that get filtered sun throughout the day would be fine for our part shade Bobbi's Bloomers. Too little sun causes the plant's flowering to stop.

**India Frills**

**Tom West**

**India Frills**

A fun, frilly coleus is the namesake of this new planter for part shade.

**\* 12" Planter \***

"Summer Wave" torenia against a sea of dark red and green foliage.

**\* 10" & 12" Hanging Baskets \***

# Shade

Available starting the beginning of May, these planters and baskets will flourish and flower with little or no sun.

Full shade is found on the north or northeast side of buildings, walls or fences or under mature trees. Our full shade combinations will also do well with limited morning sun, happiest with shade by 11 a.m. and then throughout the rest of the day. Covered porch or patio locations would be ideal for our full shade Bobbi's Bloomers.

**Pink Splash**

**White Splash**

**Pink Splash**
