

## **Stormwater Compliance SME (Subject Matter Expert):**

### **Description:**

Stormwater USA is looking for an SME (Subject Matter Expert) within the ESC (Erosion and Sediment Control) and stormwater compliance industry. For Stormwater USA, an ideal SME will possess in-depth knowledge of a particular area within the four categories of the stormwater compliance industry, including Construction stormwater, Municipal Separate Storm Sewer Systems (MS4), Industrial stormwater and Agricultural stormwater. The SME will work with Stormwater USA's e-Learning course development team and marketing team to provide technical knowledge and analysis of their applicable area and concentration of stormwater. The hired SME will also have the opportunity to present at Stormwater USA's free quarterly CEU webinar series, as well as speak during or host a live chat session at Storm Water Solutions Magazine's annual Virtual Trade Expo.

### **Responsibilities:**

- Provide web development support that includes, but is not limited to, content updates, analysis of journal articles, press releases and blog posts.
- Provide accurate and current content source materials where and when needed in relation to stormwater compliance (Construction, MS4, Industrial and Agricultural), erosion and sediment control, Low Impact Development (LID) and Green Infrastructure.
- Participate in content interviews and discussions with different departments within Stormwater USA (instructional design team, website development team, marketing team and customer and technical support team.)
- Work with instructional design to co-develop the online course objectives and provide critical input and business insight as each takes shape and the specific performance criteria are defined.
- Work with instructional design team to provide thorough, thoughtful content reviews throughout development and creation of Stormwater USA's e-learning training courses (Ex: PowerPoint presentations, script development, capturing and selecting appropriate multimedia, 2-D and 3-D graphics creation.)
- Provide thorough content reviews, audits of, as well as updates to, current Stormwater USA e-learning training courses.

### **Responsibilities Ctned:**

- Deliver presentation (topic of SME's choice) for Stormwater USA's quarterly webinar series (Optional.)
- Deliver presentation or host live chat session (topic of SME's choice) for Storm Water Solutions Magazine annual Virtual Trade Expo (Optional.)
- Schedule weekly office hours (via Stormwater USA eCampus LMS) for conferencing and consulting of Stormwater USA's student population.

### **Requirements and Qualifications:**

- Proficiency in understanding stormwater compliance and erosion and sediment control education and training
- Background or experience in instructional design as well as creating educational and informational presentations.
- Thorough understanding of the Internet as an instructional medium.
- Knowledge of Microsoft Suite (Especially Microsoft Word and PowerPoint).
- Strong interpersonal skills, especially the ability to resolve conflict and work tactfully and respectfully with a wide variety of experts and outside scholars.
- Ability to work independently.

### **Educational Requirements:**

BA required with 3-5 years of engineering, stormwater compliance or related experience.

### **Desired Career Experience:**

Environmental Engineering; Civil Engineering; Green Infrastructure; Low Impact Development; Construction, MS4, Industrial and Agricultural stormwater compliance education (state, city or municipal trainer of record.)

### **Time Commitment:**

Stormwater USA SMEs have the ability to contribute as necessary. We are amenable and flexible with our subject matter experts and wish to create a feasible schedule to accommodate their career and weekly obligations.

### **Compensation:**

TBD
